**(INTRODUCTORY TEXT: READ THE FOLLOWING TEXT BEFORE STARTING QUESTIONNAIRE 2)**

Hello, my name is \_\_\_\_\_ (also introduce the entire team present). We are here on behalf of [Ministry of Health/agency name]. An outbreak of Ebola virus disease has affected your area. The government [or any other entity conducting response actions] is taking steps to identify and test people who may be infected with Ebola for care in a specialized hospital, and to provide vaccination and monitoring for people who have been in close contact with them. Today, I want to ask you some questions to understand what you think about this disease and about Ebola response activities in your community. The information we collect will be used by [ Ministry of Health/agency name ] to improve efforts to stop the spread of Ebola virus disease. Answering the questions should take around 30 minutes.

Before you decide whether you will participate, I'd like to go over a few points:

- This survey is voluntary. You are not required to answer every question, and you can choose to end the survey at any time.
- There are no right or wrong answers. I am interested in your opinion. If you don't understand the question, let me know.
- The information you provide today will remain confidential. I will not ask for your name as part of this investigation.
- The report we are writing will be a summary of all investigations and it will not be possible to identify you or what questions you have answered.
- If at the end of this survey you want to ask questions, you can contact \_\_\_\_ (name)\_\_\_\_\_ at \_\_\_\_\_

**Would you like to participate?**

*[Write down the verbal consent to participate in the investigation; if not, thank the person for their time and close the investigation.]*

\_\_\_\_\_ Verbal consent

*[Every refusal should be recorded in a daily logbook.]*

**Before we begin, do you have any questions for me?**

## GENERAL POPULATION SURVEY 2 (DRC-SPECIFIC VERSION)

**(READ THE SCRIPT)** : As noted, Ebola response interventions revolve around a number of actions within the community: early detection of Ebola cases and treatment of infected people, follow-up of contacts to manage them if they become ill, vaccination of contacts and health professionals to prevent them from getting sick, and safe and dignified burials to prevent the spread of the Ebola virus. I will now ask you a few questions about the interventions of the Ebola response as a whole.

49. Can you tell me what the benefits of the response you think might be?	<p><b>(Don't read answer choices, check everything that applies)</b></p> <ol style="list-style-type: none"> <li>1.
